

Megabytes for Tomorrow

Computer Exchange Program for Underprivileged Children in Bangladesh

Brought to you by American Association of Bangladeshi Engineers and Architects (AABEA), Washington DC Chapter

AABEA is a non-profit, voluntary, scientific and technical professional organization organized exclusively for educational, scientific, and charitable programs.

Mission Statement: To optimize the educational experience for underprivileged children by empowering them with the technology of computers.

How Are We Going To Help?

With monetary donations from you, we intend to:

- Mobilize and engage local vendors to use local talent to build low-cost, generic, computers that are easy to deploy and maintain.
- Solicit volunteer teaching staff from universities to enlighten and broaden minds through the use of computers and access to internet.
- Give these underprivileged kids a fighting chance of relative prosperity in a digitally connected and ever shrinking globe.

Pilot Projects in Bangladesh: ORCA Home Orphanage and Chowbari Village College
